MEDICAL TECHNOLOGY WEBINAR

Saturday, 26th September 2020
10:00 AM - 12:00 PM

An outbreak of Covid-19 had caused a significant impact to our healthcare system. To many healthcare personnel, a text book chapter is now a reality. As the virus continues to mutate, our healthcare systems are also adapting to these new changes. These changes are not just limited to screening, receiving, treatment and managing a patient. The development of information technology (IT) which has been silently supporting the medical healthcare system is submerging as an important tool to disseminate information and has become the utmost effective way of communication in healthcare management. The discussion in this webinar will focus on topics regarding the digital transformation of healthcare system and its importance, and will also discuss on the associated cybersecurity issue
